Join us at the Timucuan Preserves Kingsley Plantation as we debut our new archaeology curriculum. Project Archaeology: Investigating Shelter is a supplementary science and social studies curriculum unit for grades 3 through 5. This workshop aims to familiarize educators with archaeology resources for the classroom that can enhance learning opportunities in math, science, art, and social studies. Workshop participants will receive archaeology education guides published by Project Archaeology that take students through an archaeological investigation, including accounts from oral history, use of primary documents, and interpreting the archaeological record. Most the activities will be indoors, but be prepared for outdoor walking tours of some of the ruins. Reservations are first come first serve, with a cap of 25.
